

## White Wall Tire Care

Thank you for purchasing your new white wall tires from Motorspot, Inc. We know that you can't wait to get them into good use. Here are some important tips that we would like to share with you.

Your new tire should arrive with blue film over the whitewall to protect it. This film is water soluble. To remove it, simply soak the tire with water and let it sit for a few minutes. Use a wet sponge and scrub the blue film off. Do not use soap or cleaning solutions. You may harm the white wall by doing so.

### Maintenance

The whitewall is **not** to be cleaned with any products that have alcohol, bleach or lye in them. These agents are harmful to the whitewall and may cause your whitewalls to turn yellow, brown or to crack. This is a list of products we ask you **not** to use to clean your whitewalls:

Comet Cleanser, Ajax, Brillo, SOS Pads, Armor All, Westley's Whitewall Bleach and Bartender's Friend. Read the label on the product you are considering using for cleaning. If you spot alcohol, bleach or lye, **please, do not use it.**

#### Recommended Cleaning Products

The best product that is sold over-the-counter, that we have found is Mr. Clean Magic Erasers. You can purchase the Magic Erasers at Home Depot or Walmart. These small, white sponge-pads will clean off most dirt. Another over-the-counter product we favor is Simple Green Extreme. Either product should keep your whitewall clean.

We also offer our own tire cleaner that cleanses the entire tire, the whitewall and the black surfaces.

Our Motorspot Kustoms Tire Cleaner will give your tires a deep cleaning. You simply apply the liquid with the included spray bottle and wipe the tire off with a white towel. Each time you clean your tires, the whitewall will become cleaner and cleaner. This product leaves a soft texture that offers a new-tire look. You may purchase this tire cleaner online or by giving us a phone call. [Please click here to purchase.](#)

### What if my whitewalls are already turning brown or yellow?

If you have been using the non-recommended cleaners listed above, you may have permanently ruined your whitewalls and not even our Motorspot Kustoms cleaner can save them. We do offer another product we call the **Brown Buster**.

This special formula is for what we call "end-stage" whitewalls, that are one step removed from the trash dumpster. Hopefully, you will never need this product if you follow the above steps. Keep the Brown Buster product in mind if your whitewalls have already discolored. If it does not work, nothing will work to save your whitewalls. [Please click here to purchase.](#)

Technical support is always a phone call or email away. Thank you for your business.
